Mr. Lee W. Landrum
756 S. Broadway
Los Angeles 14, California

Dear Mr. Landrum:

We are enclosing herewith completed copies for your files of our forms O&G 55 and 56 covering the Landrum-Gabrielson-State #1, in Section 14, Township 5N., Range 3 E., Maricopa County and our form O&G 55 covering the Landrum-Gabrielson-Salyer in Section 7, Township 5N., Range 4 E., Maricopa County. Form O&G 56 was not necessary on the latter well, due to the fact that this well was accepted as a water well by Mr. Walter E. Salyer of Cavecreek, Arizona.

We are also enclosing a copy of our letter to the American Surety Company of Los Angeles releasing the two bonds in conjunction with the drilling of these wells.

Very truly yours,

James R. Burger,
Deputy State Land Commissioner
State Land Department

JRB:mb
Encl.

September 14, 1953

Mr. A. E. Krull
Superintendent of Surety Bonds
American Surety Company
510 South Spring Street
Los Angeles 13, California

Dear Mr. Krull:

Re: 18-530-440 & 18-523-988

The bonds in the amount of \$10,000.00 each were issued on December 23, 1952 and on February 18, 1953 respectively to cover wells for drilling of oil and gas in the State of Arizona by the Landrum-Gabrielson-State #1, in Section 14, Township 5N., Range 3 E., Maricopa County, and by the Landrum-Gabrielson-Salyer in Section 7, Township 5N., Range 4 E., Maricopa County, as principal, and the American Surety Company as surety. These bonds were conditioned upon the drilling, casing and plugging of all oil and gas wells drilled to prevent the escape of oil or gas from one stratum to another, to prevent intrusion of water into an oil or gas stratum from a separate stratum, to prevent the pollution of fresh water supplies by oil, gas or salt water and to prevent waste.

In addition, said bonds were conditioned upon the submission of all reports required by the Oil and Gas Conservation Act of 1951 of the State of Arizona, and the Rules and Regulations of the State Land Department, such as logs, drilling records, and other reports as are required by said Rules and Regulations of the Oil and Gas Conservation Law of Arizona.

The records of the Department indicate that with respect to the wells drilled by the above mentioned individuals that all requirements as contained in said Oil and Gas Conservation Law of Arizona and the Rules and Regulations of the State Land Department, have been met and complied with and therefore, the bonds heretofore described may be terminated.

Very truly yours,

James R. Burger,
Deputy State Land Commissioner,
State Land Department

August 11, 1953.

State Land Department,
State of Arizona,
Phoenix, Arizona.

Attention: Mr. James R. Burger, Deputy

Gentlemen:

Enclosed you will please find one executed copy, marked "Copy", of your form O&G 55, prepared in your office, on Well L&G 14-1. Your attention is respectfully called to the fact that this form 55 is an "Application to Abandon, etc.," and paragraph 2 thereof is for full details of proposed plan of work, but the reading matter contained in this paragraph, as prepared in your office, sets forth that the work has already been done, and not proposed.

Also, I wish to acknowledge receipt of your letter of August 7th, in which you say the well samples left at your office by Mr. Park have now been located, but that you have not located the logs. Upon discussing this matter with Mr. Park the last time I saw him, he was very positive that he left the logs with you at the same time he left the samples. Mr. Park is on a job out of the city at present, and I do not anticipate seeing him for a week or two. In the meantime, I have compiled a log of the two wells from reports sent to me from the wells as they were being drilled. My duties as Trustee required this log information; therefore, I believe it to be accurate, and trust it will be acceptable to your office. Upon contacting Mr. Park when he comes to the city again, I will find out whether or not he kept a copy of the logs he prepared and claims to have left at your office. If so, I will obtain a copy from him and forward same to you. I will appreciate it, however, if you will speed up the matter of having the drilling bond released on these wells, and advise me that same has been done at your earliest convenience.

Very truly yours,

Lee W. Landrum

August 7, 1953

Mr. Lee W. Landrum
756 S. Broadway
Los Angeles, 14, California

Dear Mr. Landrum:

We are in receipt of a letter from Mr. P. W. Johnson, geologist, in which he states that the samples of the two wells, Landrum-Gabrielson - State 14-1 and Landrum-Gabrielson-Salyer, have been received by him and are now at Tucson, Arizona.

In regard to the logs on the two above mentioned wells, Mr. Johnson has informed this office that no logs have been received by him.

In order to expedite matters relating to the release of the bond, we suggest that you contact Mr. Park and have him send the logs on these two wells, as well as sign the necessary papers that we sent you along with our letter of August 5th, 1953.

Very truly yours,

James R. Burger,
Deputy State Land Commissioner,
State Land Department

JRB:mb

August 5, 1953

Mr. Lee W. Landrum
756 S. Broadway
Los Angeles 14, California

Dear Mr. Landrum:

Reference is made to your letter of August 4th regarding the necessary forms needed for completion for our files.

We are enclosing for your convenience, a copy of our form O&G 55 in connection with the well located on Section 14, T. 5N., R. 3E., for Mr. Park to sign and return to this office. We are also sending you duplicate copies of our Form O&G 56 which must be filled out, signed before a notary public and returned to this office.

In regard to the well located on Section 7, T. 5N., R. 4E., we have duplicate copies of our Form O&G 55 and as this well has been accepted by Mr. Walter F. Salyer as a water well and that Mr. Salyer has agreed to assume any liability as a property owner, it will not be necessary for you to file form O&G 56 on this particular well.

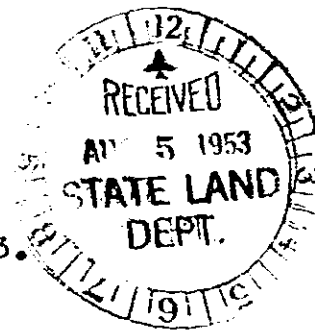

We would like to state that the samples mentioned in our letter of July 22nd, that there were some samples delivered to Mr. Johnson, our geologist, and were taken by him to Tucson for analysis. We are writing to him in order to determine if the samples received by him were on both wells. We do not have any record in this office as to whether a log of any kind was delivered to him. As soon as we hear from him regarding this matter we will be glad to inform you.

Very truly yours,

James R. Burger,
Deputy State Land Commissioner
State Land Department

JRB:mb
Encl.

August 4, 1953.

Dear Sir:

My delay in replying is due to the fact that I have been waiting to contact Mr. T. O. Park who, with Mr. J. H. Royer, now deceased, supervised the drilling of the two wells in question. Mr. Park was in to see me today, and reported, as follows:

- (a) Form O&G, on Salyer #1, Section 7, 5N, R 3E, Maricopa County, Arizona, will be completed and returned to you with other reports, after hearing from you in answer to this letter.
- (b) Mr. Park says that he called at the office of the State Land Department relative to the abandonment of Well No. 14-1, Section 14, T 5N, R 3E, Maricopa County, Arizona, and there was assisted by an attendant in preparing Form O&G 56, which he signed and left there. This report, Mr. Park says, recited that he pumped mud into the hole from a total depth of 1136 ft. to within 50 ft. of the surface, and then put in a cement plug from 50' to the surface, as he was required to do by State authorities of the State Land Department.
- (c) Insofar as a duplicate copy of Form O&G 55 is concerned on Well No. 14-1, if you will be good enough to return the one copy which you say you have, I will see that an exact duplicate is prepared and executed, and both copies returned to you.
- (d) Mr. Park states that he left with the State Land Department office complete well cuttings and logs of both wells, cuttings being submitted in sealed envelopes, and clearly marked. No electric logs

were made.

If you will be good enough to forward to me the one copy of the Application to Abandon, Form No. 55, referred to in (c) above, and make a search for the well cuttings and logs, and the report referred to in (b) above, letting me know what to do in the event you fail to find them, I will appreciate it, and do all I can to comply with your wishes in the matter.

Yours very truly,

Lee W. Landrum

Dear Sir:

Effective February 18, 1953, this company executed an oil and gas drilling bond in the amount of \$10,000.00 on behalf of Lee W. Landrum and Theodore R. Gabrielson in favor of the State of Arizona.

This transaction is described as follows:

Salzer - Sec. 7-1D, T. 5 N., R. 4 E.,
Salt River and Gila Meridian,
Maricopa County, Arizona.

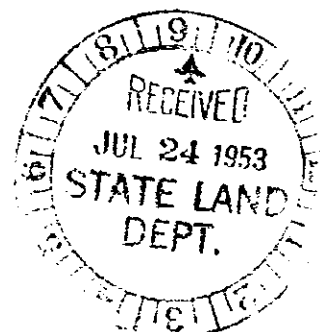

Our principals have informed us that this well was abandoned.

If your records show this to be the case, will you please authorize our company to cancel its records in connection with this bond?

American Surety Company
510 South Spring Street
Los Angeles, 13, California

Dear Mr. Krull

Re: 18-530-440 & 18-523-988

In regard to your letter of June 25th, concerning the release of the bond covering the two wells, Landrum-Gabrielson-State No. 14-1, Section 14, T. 5N., R. 3E., Maricopa County, and Landrum-Gabrielson-Salyer, #1, Section 7, 5N., R. 4E., Maricopa County, Arizona, our records show that the affidavit in conjunction with the Abandonment and Plugging Record for the well located on Section 7, T. 5N., R. 4E. was returned to us unsigned and was not notarized. A duplicate copy of this record should have also been returned to this office.

With respect to the well located on Section 14, T. 5N., R. 3E., this office has only received one copy of the Application to Abandon, Form No. 55, of which we must have a duplicate copy. Also, we have not received duplicate copies of the Abandonment and Plugging Record, Form No. 56, which must be signed by the operator and duly notarized.

State regulations also specify that a complete set of cuttings and cores, well logs, electric or otherwise, are to be turned over to the State Land Department. This provision was not satisfactorily complied with in either of these two wells.

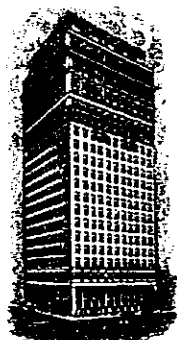

Until such time as we have received these forms properly completed and other data, we can not release the bond.

Very truly yours,

Phillip W. Johnson, Geologist,
State Land Department

December 19, 1952

Mr. Phillip W. Johnson,
Post Office Box 2270,
Tucson, Arizona.

Dear Phil:

Enclosed herewith is a notice of intention to drill oil or gas well. Will you please review the information thereon and advise if there is any objection to the application in its present form? Mr. T. L. Park, the engineer, has stated verbally that the electronics survey of the township indicates no water whatsoever at any depth. He feels sure this information is correct because there are several dry water holes in the township. His explanation is that this particular township lies between two faults and for this reason he feels sure that the electronics survey is accurate.

The driller is contracted for, to start operations on December 30th, and for this reason we would appreciate a speedy reply with respect to the said application.

Yours very truly,
